

Critical Reagent Processing Corp.

Consolidated Financial Statements
(Expressed in Canadian Dollars)
(Unaudited)

For the six months ended December 31, 2025

NOTICE TO READER

Under National Instrument 51-102, Part 4, subsection 4.3(3)(a), if an auditor has not performed a review of the interim financial statements, they must be accompanied by a notice indicating that the financial statements have not been reviewed by an auditor.

The accompanying unaudited condensed interim financial statements have been prepared by and are the responsibility of the management.

The Company's independent auditor has not performed a review of these financial statements in accordance with the standards established by the Canadian Institute of Chartered Professional Accountants for a review of interim financial statements by an entity's auditor.

Critical Reagent Processing Corp.

Notes to the Condensed Consolidated Interim Financial Statements

(Expressed in Canadian Dollars - Unaudited)

For the six months ended December 31, 2025

1. Nature of operations and going concern

Critical Reagent Processing Corp. (the "Company") was incorporated on October 14, 2016 under the laws of the province of British Columbia, Canada, and its principal activity is the acquisition and exploration of mineral properties. The Company's shares are listed on the Canadian Securities Exchange ("CSE"), under the trading symbol to CSE:CRPC. During the year ended June 30, 2025, the Company completed a 10 for 1 share consolidation. All references to the number of shares and per share amounts have been retroactively restated to reflect the consolidation.

The head office and principal address and registered records office of the Company is located at 1681 Chestnut Street, Suite 400, Vancouver, British Columbia, Canada, V6J 4M6.

These consolidated financial statements have been prepared on the assumption that the Company will continue as a going concern, meaning it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the ordinary course of operations. Different bases of measurement may be appropriate if the Company is not expected to continue operations for the foreseeable future. At December 31, 2025, the Company had not achieved profitable operations, had an accumulated deficit of \$11,115,477, had not advanced its mineral property to commercial production and expects to incur further losses in the development of its business, all of which indicate a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern. The Company's continuation as a going concern is dependent upon successful results from its mineral property exploration activities and its ability to attain profitable operations to generate funds and/or its ability to raise equity capital or borrowings sufficient to meet its current and future obligations. Although the Company has been successful in the past in raising funds to continue operations, there is no assurance it will be able to do so in the future.

These consolidated financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

2. Statement of compliance with IFRS and material policy information

These consolidated interim financial statements were authorized for issue on March 2, 2026, by the directors of the Company.

Statement of compliance with International Financial Reporting Standards

These condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting. These interim financial statements do not contain all of the information required for full annual financial statements and should be read in conjunction with the annual audited financial statements for the year ended June 30, 2025.

Basis of preparation

These consolidated interim financial statements have been prepared on a historical cost basis, except for financial instruments classified as financial instruments at fair value through profit and loss, which are stated at their fair value. In addition, these consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow information. These consolidated interim financial statements are presented in Canadian dollars unless otherwise noted.

Critical Reagent Processing Corp.

Notes to the Condensed Consolidated Interim Financial Statements

(Expressed in Canadian Dollars - Unaudited)

For the six months ended December 31, 2025

2. Statement of compliance with IFRS and material policy information (cont'd)

Consolidation

These consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries, Pilbara Gold Group Pty. Ltd ("Pilbara") incorporated in Australia and Critical Reagents Argentina S.A.S. incorporated in Argentina. During the year ended June 30, 2025, the Company wrote off the assets and liabilities in its subsidiary, Pilbara, due to inactivity and recognized a gain of \$548.

Significant accounting judgments, estimates and assumptions

The preparation of consolidated financial statements in conformity with IFRS requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported revenues and expenses during the period.

Although management uses historical experience and its best knowledge of the amount, events or actions to form the basis for judgments and estimates, actual results may differ from these estimates.

The most significant accounts that require estimates as the basis for determining the stated amounts include the valuation of share-based payments and recognition of deferred tax amounts.

Critical judgments exercised in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are as follows:

- i) Going concern
The Company's ability to execute its strategy by funding future working capital requirements requires judgment. Estimates and assumptions are continually evaluated and are based on historical experience and other factors, such as, expectations of future events that are believed to be reasonable under the circumstances.
- ii) Impairment of assets
Economic recoverability and probability of future benefits of exploration and evaluation assets. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefits including geologic and other technical information, history of conversion of mineral deposits with similar characteristics to its own properties to proven and probable mineral reserves, the quality and capacity of existing infrastructure facilities, evaluation of permitting and environmental issues and local support for the project.
- iii) Exploration and evaluation expenditures
The carrying value and the recoverability of exploration and evaluation assets, which are included in the statements of financial position. The cost model is utilized and the value of the exploration and evaluation assets is based on the acquisition costs incurred. At every reporting period, management assesses the potential impairment which involves assessing whether or not facts or circumstances exist that suggest the carrying amount exceeds the recoverable amount.
- iv) Deferred taxes
Deferred tax assets are recognized for all deductible temporary differences, carry-forward of unused tax assets and unused tax losses, to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences and carry-forward of unused tax assets and unused tax losses can be utilized.

Critical Reagent Processing Corp.

Notes to the Condensed Consolidated Interim Financial Statements

(Expressed in Canadian Dollars - Unaudited)

For the six months ended December 31, 2025

2. Statement of compliance with IFRS and material policy information (cont'd)

v) Share-Based Compensation

The Company uses the fair value method of valuing compensation expense associated with the Company's share-based compensation plan. Estimating fair value requires determining the most appropriate valuation model for a grant of equity instruments, which is dependent on the terms and conditions of the grant.

Foreign currency translation

The functional currency of the Company is measured using the currency of the primary economic environment in which the Company operates. These financial statements are presented in Canadian dollars which is the Company's functional and presentation currency. The functional currency for the Company's subsidiaries is also the Canadian dollar.

Foreign currency transactions are translated into functional currency using the exchange rates prevailing at the date of the transaction. Foreign currency monetary assets and liabilities are translated at the period end exchange rate. Non-monetary assets and liabilities measured at historical cost continue to be carried at the exchange rate at the date of the transaction. Non-monetary assets and liabilities measured at fair value are reported at the exchange rate at the date when fair values were determined. Exchange differences arising on the translation of monetary items or on settlement of monetary items are recognized in profit or loss in the statement of loss and comprehensive loss in the period in which they arise, except where deferred in equity as a qualifying cash flow or net investment hedge.

Share-based payments

Share-based payments to employees are measured at the fair value of the instruments issued and amortized over the vesting periods. Share-based payments to non-employees are measured at the fair value of goods or services received or the fair value of the equity instruments issued, if it is determined the fair value of the goods or services cannot be reliably measured and are recorded at the date the goods or services are received. The corresponding amount is recorded to reserves. The fair value of options is determined using the Black-Scholes Option Pricing Model which incorporates all market vesting conditions. The number of shares and options expected to vest is reviewed and adjusted at the end of each reporting period such that the amount recognized for services received as consideration for the equity instruments granted shall be based on the number of equity instruments that eventually vest. Vesting is determined by the Board of Directors.

Financial instruments

The following is the Company's accounting policy for financial instruments under IFRS 9:

(i) Classification

The Company classifies its financial instruments in the following categories: at fair value through profit and loss ("FVTPL"), at fair value through other comprehensive income (loss) ("FVTOCI") or at amortized cost. The Company determines the classification of financial assets at initial recognition. The classification of debt instruments is driven by the Company's business model for managing the financial assets and their contractual cash flow characteristics. Equity instruments that are held for trading are classified as FVTPL. For other equity instruments, on the day of acquisition the Company can make an irrevocable election (on an instrument-by-instrument basis) to designate them as at FVTOCI. Financial liabilities are measured at amortized cost, unless they are required to be measured at FVTPL (such as instruments held for trading or derivatives) or if the Company has opted to measure them at FVTPL.

Critical Reagent Processing Corp.

Notes to the Condensed Consolidated Interim Financial Statements

(Expressed in Canadian Dollars - Unaudited)

For the six months ended December 31, 2025

2. Statement of compliance with IFRS and material policy information (cont'd)

Financial instruments (cont'd)

The following table shows the classification under IFRS 9:

<u>Financial assets/liabilities</u>	<u>Classification</u>
Cash	FVTPL
Trade payables	Amortized cost

(ii) Measurement

Financial assets and liabilities at amortized cost

Financial assets and liabilities at amortized cost are initially recognized at fair value plus or minus transaction costs, respectively, and subsequently carried at amortized cost less any impairment.

Financial assets and liabilities at FVTPL

Financial assets and liabilities carried at FVTPL are initially recorded at fair value and transaction costs are expensed in the statements of loss and comprehensive loss. Realized and unrealized gains and losses arising from changes in the fair value of the financial assets and liabilities held at FVTPL are included in the statements of loss and comprehensive loss in the period in which they arise.

(iii) Impairment of financial assets at amortized cost

The Company recognizes a loss allowance for expected credit losses on financial assets that are measured at amortized cost. At each reporting date, the Company measures the loss allowance for the financial asset at an amount equal to the lifetime expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition. If at the reporting date, the financial asset has not increased significantly since initial recognition, the Company measures the loss allowance for the financial asset at an amount equal to the twelve month expected credit losses. The Company recognizes in the statements of loss and comprehensive loss, as an impairment gain or loss, the amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognized.

(iv) Derecognition

Financial assets

The Company derecognizes financial assets only when the contractual rights to cash flows from the financial assets expire, or when it transfers the financial assets and substantially all of the associated risks and rewards of ownership to another entity.

Financial liabilities

The Company derecognizes a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company also derecognizes a financial liability when the terms of the liability are modified such that the terms and / or cash flows of the modified instrument are substantially different, in which case a new financial liability based on the modified terms is recognized at fair value.

Gains and losses on derecognition are generally recognized in profit or loss.

Critical Reagent Processing Corp.

Notes to the Condensed Consolidated Interim Financial Statements

(Expressed in Canadian Dollars - Unaudited)

For the six months ended December 31, 2025

2. Statement of compliance with IFRS and material policy information (cont'd)

Financial instruments (cont'd)

Impairment of assets

The carrying amount of the Company's assets is reviewed at each reporting date to determine whether there is any indication of impairment. If such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. An impairment loss is recognized whenever the carrying amount of an asset or its cash generating unit exceeds its recoverable amount. Impairment losses are recognized in the statement of loss and comprehensive loss.

The recoverable amount of assets is the greater of an asset's fair value less cost to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pretax discount rate that reflects the current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

An impairment loss is only reversed if there is an indication that the impairment loss may no longer exist and there has been a change in the estimates used to determine the recoverable amount, however, not to an amount higher than the carrying amount that would have been determined had no impairment loss been recognized in previous years.

Assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment.

Cash

Cash includes cash on hand and deposits held at call with banks.

Income taxes

Current income tax:

Current income tax assets and liabilities for the current period are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date, in the countries where the Company operates and generates taxable income.

Current income tax relating to items recognized directly in other comprehensive income or equity is recognized in other comprehensive income or equity and not in profit or loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred income tax:

Deferred tax is accounted for using the statement of financial position liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred taxes are not recognized for temporary differences related to the initial recognition of the assets or liabilities that affect neither accounting nor taxable profit nor investments in subsidiaries, associates and interests in joint ventures to the extent it is probable that they will not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner and expected date of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the statement of financial position date.

Critical Reagent Processing Corp.

Notes to the Condensed Consolidated Interim Financial Statements

(Expressed in Canadian Dollars - Unaudited)

For the six months ended December 31, 2025

2. Statement of compliance with IFRS and material policy information (cont'd)

A deferred tax asset is recognized only to the extent that it is probable that future taxable amounts will be available against which the asset can be utilized.

Loss per share

Basic loss per share is computed by dividing net loss available to common shareholders by the weighted average number of shares outstanding during the reporting period. Diluted loss per share is computed similar to basic loss per share except that the weighted average shares outstanding are increased to include additional shares for the assumed exercise of stock options and warrants, if dilutive. The number of additional shares is calculated by assuming that outstanding stock options and warrants were exercised and that the proceeds from such exercise were used to acquire common shares at the average market price during the reporting period. For the year presented, this calculation proved to be anti-dilutive. Diluted loss per share is equal to the basic loss per share.

Restoration and environmental obligations

The Company recognizes liabilities for legal and constructive obligations associated with the retirement of exploration and evaluation assets. The net present value of future rehabilitation costs is capitalized to the related asset along with a corresponding increase in rehabilitation provision in the period incurred. Discount rates using a pre-tax rate that reflect the time value of money are used to calculate the net present value.

The Company's estimates of reclamation costs could change as a result of changes in the regulatory requirements, discount rates and assumptions regarding the amount and timing of the future expenditures. These changes are recorded directly to the related assets with a corresponding entry to the rehabilitation provision. The increase in the provision due to the passage of time is recognized as interest expense.

The Company did not have any restoration provisions as at the years ended June 30, 2025 and 2024.

Exploration and evaluation assets

All costs related to the acquisition of exploration and evaluation assets are capitalized on a property-by-property basis, net of recoveries. Exploration costs incurred prior to the determination of the feasibility of mining operations and a decision to proceed with development are expensed to operations as incurred. If economically recoverable ore reserves are developed, capitalized costs of the related property are classified as mining assets and amortized using the unit-of-production method. When a property is abandoned, all related costs are written off to operations.

The amounts shown for acquisition costs represent costs incurred to date and do not necessarily reflect present or future values. These costs are depleted over the useful lives of the properties upon commencement of commercial production or written off if the properties are abandoned or the claims allowed to lapse.

From time to time, the Company may acquire or dispose of an exploration and evaluation asset pursuant to the terms of an option agreement. As the options are exercisable entirely at the discretion of the optionee, the amounts payable or receivable are not recorded. Option payments are recorded as property costs or recoveries when the payments are made or received. Proceeds received on the sale of an option of the Company's property are recorded as a reduction of the mineral property cost. The Company recognizes in income amounts received in excess of the carrying amount.

Critical Reagent Processing Corp.

Notes to the Condensed Consolidated Interim Financial Statements

(Expressed in Canadian Dollars - Unaudited)

For the six months ended December 31, 2025

2. Statement of compliance with IFRS and material policy information (cont'd)

Exploration and evaluation assets are tested for impairment if facts or circumstances indicate that impairment exists. Examples of such facts and circumstances are as follows:

- the period for which the Company has the right to explore in the specific area has expired during the period or will expire in the near future, and is not expected to be renewed;
- substantive expenditure on further exploration for and evaluation of mineral resources in the specific area is neither budgeted nor planned;
- exploration for and evaluation of mineral resources in the specific area have not led to the discovery of commercially viable quantities of mineral resources and the entity has decided to discontinue such activities in the specific area; and
- sufficient data exist to indicate that, although a development in the specific area is likely to proceed, the carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development or by sale.

After technical feasibility and commercial viability of extracting a mineral resource are demonstrable, the Company stops capitalizing expenditures for the applicable block of claims or geological area of interest and tests the asset for impairment. The capitalized balance, net of any impairment recognized, is then reclassified to either tangible or intangible mine development assets according to the nature of the asset.

Accounting standards and amendments issued

IFRS 18 – Presentation and Disclosure in Financial Statements

In April 2024, the IASB issued IFRS 18, Presentation and Disclosure of Financial Statements (IFRS 18), which replaces IAS 1, Presentation of Financial Statements. IFRS 18 introduces a specified structure for the income statement by requiring income and expenses to be presented into the three defined categories of operating, investing and financing, and by specifying certain defined totals and subtotals. Where company-specific measures related to the income statement are provided, IFRS 18 requires companies to disclose explanations around these measures, which are referred to as management defined performance measures. IFRS 18 also provides additional guidance on principles of aggregation and disaggregation which apply to the primary financial statements and the notes.

IFRS 18 will not affect the recognition and measurement of items in the financial statements, nor will it affect which items are classified in other comprehensive income and how these items are classified. The standard is effective for reporting periods beginning on or after January 1, 2027, including for financial statements. Retrospective application is required, and early application is permitted. The Company is currently assessing the effect of this new standard on its financial statements.

Critical Reagent Processing Corp.

Notes to the Condensed Consolidated Interim Financial Statements

(Expressed in Canadian Dollars - Unaudited)

For the six months ended December 31, 2025

3. Receivables

The balance in receivables at December 31, 2025 is \$568,901 (June 30, 2025 - \$39,348):

	December 31, 2025	June 30, 2025
	-\$-	-\$-
Loan receivable ¹	522,163	-
Government tax credits receivable	46,738	39,348
Total	568,901	39,348

¹ During the period ended December 31, 2025, the Company entered into an unsecured loan agreement with a company that has directors in common, to loan up to \$600,000, paying interest at 8% per annum due and payable on demand. Pursuant to the agreement, the Company loaned US\$373,095, or \$522,163 to date.

4. Trade payables and accrued liabilities

	December 31, 2025	June 30, 2025
	-\$-	-\$-
Trade payables	27,516	23,930
Accrued liabilities	16,600	21,000
Total	44,116	44,930

5. Exploration and evaluation assets

The Company incurred acquisition costs as follows:

	December 31, 2025	June 30, 2025
	-\$-	-\$-
Opening	397,149	397,149
Acquisition costs - cash	-	-
Total	397,149	397,149

Laguna Santa Maria project, Argentina

During the year ended June 30, 2024, the Company completed its purchase option agreement to acquire up to a 100% interest in the Mina Laguna Santa Maria project, which consists of two mining concessions licensed for the production of sodium carbonate, by way of purchase option agreement. The Company now holds 100% of exploration licenses N° 17.643 Ignacio VI and 86% of N° 1.255 Santa Maria. During the year ended June 30, 2024, the Company has filed documentation to obtain the remaining 14% of Santa Maria.

The terms of the purchase option agreement are further described below:

- payment of US\$100,000 on execution of the purchase option agreement (paid) and
- payment of US\$150,000 following a three-month due diligence period (paid).

As at December 31, 2025, the balance of exploration and evaluation assets is \$397,149 (June 30, 2025 - \$397,149).

Critical Reagent Processing Corp.

Notes to the Condensed Consolidated Interim Financial Statements

(Expressed in Canadian Dollars - Unaudited)

For the six months ended December 31, 2025

6. Share capital and reserves

Authorized share capital

An unlimited number of common shares without par value.

Issued share capital

As at December 31, 2025, there are 7,032,298 (June 30, 2025 – 7,032,306) issued and fully paid common shares.

During the year ended June 30, 2025, the Company completed a 10 for 1 share consolidation. All references to the number of shares and per share amounts have been retroactively restated to reflect the consolidation.

During the period ended September 30, 2025 and the year ended June 30, 2024, there were no share capital transactions.

Warrants

The following table summarizes information about the warrant transactions during the period ended September 30, 2025 and the year ended June 30, 2025:

	Number of warrants	Weighted average exercise price - \$ -
Outstanding, June 30, 2024	4,244,840	1.80
Expired, unexercised	(4,244,840)	1.80
Outstanding, June 30, 2025 and December 31, 2025	-	-

	Exercise Price - \$ -	Number of Warrants
Expiry Date		
March 25, 2025 – expired, unexercised	1.80	4,244,840

During the year ended June 30, 2025, 4,244,840 warrants with an exercise price of \$1.80 expired unexercised.

Critical Reagent Processing Corp.

Notes to the Condensed Consolidated Interim Financial Statements

(Expressed in Canadian Dollars - Unaudited)

For the six months ended December 31, 2025

6. Share capital and reserves (cont'd)

Stock options

The Board has approved a Stock Option Plan, designed for selected employees, officers, directors, consultants and contractors, to incentivize such individuals to contribute toward the Company's long-term goals, and to encourage such individuals to acquire shares as long-term investments. The Stock Option Plan is administered by the Board and authorizes the issuance of stock options not to exceed a total of 10% of the number of shares issued and outstanding from time to time. The terms of any award are determined by the Board, provided that no options may be granted at less than the fair market value of shares as of the date of the grant. The maximum term of the options is ten years.

As at the period ended December 31, 2025, there were nil stock options outstanding (June 30, 2025 – nil).

During the year ended June 30, 2025, the Company cancelled 692,000 stock options priced at \$2.00, the balance of stock options outstanding at the period ended was nil.

The following table summarizes information about stock options during the period ended December 31, 2025 and the year ended June 30, 2025:

	Options	
	Number of options	Weighted average exercise price
		- \$ -
Outstanding, June 30, 2024	692,000	2.00
Cancelled	(692,000)	2.00
Outstanding, June 30, 2025, and December 31, 2025	-	-

As at December 31, 2025 and June 30, 2025, the Company had nil stock options outstanding.

Reserve

The share-based payment and warrant reserves records items recognized as share-based compensation expense until such time that the stock options or warrants are exercised, at which time the corresponding amount will be transferred to share capital.

During the years ended the period ended December 31, 2025 and the year ended June 30, 2025, the Company had no transactions recorded to reserves.

7. Related party transactions

Balances

As at December 31, 2025, the Company prepaid \$14,188 (June 30, 2025 - \$17,188) in fees relating to January 2026 and July 2025 respectively to companies controlled by directors and/or an officer of the Company.

Summary of key management personnel compensation:

Key management personnel include those persons having authority and responsibility for planning, directing, and controlling the activities of the Company as a whole. The Company has determined that key management personnel consist of members of the Company's Board of Directors and Corporate Officers. The remuneration for these key management personnel is included in the amounts disclosed below.

Transactions

During the period ended September 30, 2025, the Company incurred management fees of \$62,537 (2024 - \$62,277) to the CEO of the Company, director fees of \$33,750 (2024 - \$33,750) to a company controlled by a director of the Company and consulting fees of \$45,000 (2024 - \$45,000) with a company controlled by the CFO of the Company which are included recorded in consulting, management and director fees and consulting and geological fees of \$24,413 (2024 - \$20,711), which are included in exploration expenses, to a company controlled by a director of the Company.

8. Financial risk and capital management

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is summarized as follows:

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk is on its cash held in bank accounts. The majority of cash is deposited in bank accounts at a major bank in Canada. As most of the Company's cash is held by one bank there is a concentration of credit risk. This risk is managed by using major banks that are high credit quality financial institutions as determined by rating agencies. Credit risk is assessed as low.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has a planning and budgeting process in place to help determine the funds required to support the Company's normal operating requirements on an ongoing basis. The Company ensures that there are sufficient funds to meet its short-term business requirements, taking into account its anticipated cash flows from operations and its holdings of cash.

Historically, the Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placements. The Company's access to financing is always uncertain. There can be no assurance of continued access to necessary levels of equity funding. Liquidity risk is assessed as high.

Foreign exchange risk

Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency.

Notes to the Condensed Consolidated Interim Financial Statements

(Expressed in Canadian Dollars - Unaudited)

For the six months ended December 31, 2025

8. Financial risk and capital management (cont'd)

If the Canadian dollar changes by one percent against the US Dollar, with all other variables held constant, the impact on the Company's foreign denominated financial instruments would result in a nominal change in profit or loss.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is not exposed to significant interest rate risks.

Capital Management

The Company's policy is, if permitted by market conditions, to maintain a strong capital base so as to support investor and creditor confidence and support future development of the business. The capital structure of the Company consists of equity, comprising share capital and reserves net of accumulated deficit. The Company is not subject to any externally imposed capital requirements and there were no changes to the Company's capital management for the period ended December 31, 2025 and the year ended June 30, 2025.

Fair value

The Company's financial instruments consist of cash and trade payables. The fair value of these financial instruments approximates their carrying values due to the short-term nature of these investments.

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

Cash is measured at fair value using Level 1 inputs.
